Alex Chen

Senior Full Stack Software Engineer

San Francisco, CA | (415) 890-2341 | alex.chen.dev@gmail.com | linkedin.com/in/alexchen-dev | github.com/alexchen-cloud

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Software Engineer with 7+ years of experience architecting resilient cloud platforms, high-throughput microservices, and modern web applications. Expert in Python, JavaScript, REST APIs, SQL, and enterprise Databases. Proven track record establishing robust CI/CD pipelines, containerizing workloads with Docker, and applying OOP design patterns to achieve 99.99% system availability.

CORE TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, TypeScript, SQL, Java
Web & APIs:	REST APIs, GraphQL, FastAPI, Django, React, Node.js, Express
Databases & Storage:	Databases, PostgreSQL, SQL, MySQL, Redis, MongoDB
DevOps & Infrastructure:	Docker, CI/CD, Git, Linux, Kubernetes, AWS
Practices & Testing:	OOP, Unit Testing, Agile, Scrum, Microservices, Problem Solving

PROFESSIONAL EXPERIENCE

Lead Full Stack Software Engineer • Nexus Cloud Systems

2021 - Present | San Francisco, CA

- Architected and deployed 14 high-throughput microservices using **Python** (FastAPI) and **JavaScript** (React), serving 1.2M daily active users.
- Designed scalable **REST APIs** and optimized relational **Databases** with complex **SQL** query tuning, reducing response latency by 42%.
- Built automated **CI/CD** workflows with **Git** and **Docker** containers, cutting deployment turnaround from 4 hours to 12 minutes.
- Mentored 6 junior engineers on **OOP** design principles, clean architecture, and **Unit Testing**, maintaining 94% test coverage.
- Collaborated in bi-weekly **Agile** and **Scrum** sprints to deliver roadmap features ahead of schedule.

Full Stack Developer • FinFlow Technologies

2018 - 2021 | San Jose, CA

- Developed secure customer dashboard and payment checkout workflows using **Python**, **JavaScript**, and PostgreSQL **Databases**.
- Implemented **REST APIs** interfacing third-party payment gateways with strict idempotency and **SQL** transaction isolation.
- Containerized monolithic applications into modular **Docker** services, streamlining local development and automated testing.
- Led code reviews using **Git** pull requests, enforcing rigorous **Unit Testing** and **OOP** standards.

EDUCATION & CREDENTIALS

B.S. in Computer Science • University of California, Berkeley

2014 - 2018 | Berkeley, CA

- Graduated Magna Cum Laude. Coursework in Distributed Systems, Database Management, and Algorithms.

Certifications: AWS Certified Solutions Architect • Docker Certified Associate (DCA)
